

SRI HARISH

Data Analyst | Business Intelligence | Software Development

Chennai, Tamil Nadu | +91-9489231147 | harishsri632@gmail.com | linkedin.com/in/sri-harish-03219432b | github.com/SriHarish2006

PROFESSIONAL SUMMARY

Computer Science Engineering student (Class of 2027) with hands-on experience across two internships in Data Analytics and Software Development. Skilled in SQL, Python, Power BI, Tableau, and Excel, with proven ability to build dashboards, automate reporting, and apply statistical analysis and machine learning to business problems. Published deep learning researcher (ICIRIST 2026) and international conference presenter. Seeking a fresher role in Data Analytics, Business Intelligence, or Software Development to drive measurable, data-backed business impact.

TECHNICAL SKILLS

Programming: Python, SQL, Java

Data Analytics & BI: Power BI, Tableau, DAX, Power Query, Excel, EDA, Dashboard Development, KPI Reporting

Machine Learning: TensorFlow, Keras, Pandas, NumPy, Matplotlib, Seaborn, Predictive Modeling

Databases: MySQL, MongoDB, Query Optimization

Tools & Platforms: Git, GitHub, Jupyter Notebook, REST APIs, Google Cloud Platform, OOP

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering

Expected May 2027

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College, Chennai, Tamil Nadu

INTERNSHIP EXPERIENCE

AI & Data Analytics Intern — NoviTech R&D Private Limited, Chennai

Jun 2024 – Jul 2024

- Built and deployed interactive Power BI dashboards for the R&D team, streamlining data refresh cycles and reducing manual reporting time.
- Analyzed large-scale operational datasets using SQL and Python (Pandas) to surface actionable insights that informed R&D decision-making.
- Partnered with cross-functional stakeholders to design Excel-based visualizations, translating raw data into client-facing insights.

Java with DSA Intern — Innoknowvex Pvt Ltd, Chennai *Feb 2026 – Apr 2026*

- Completed intensive training in **Java programming and Data Structures & Algorithms**, applying object-oriented principles to solve real-world coding challenges.
- Strengthened **algorithmic problem-solving and optimization skills** through hands-on projects and practical exercises.
- Earned a **certified internship recognized by the Ministry of MSME, Govt. of India and ISO 9001:2015 standards**, validating technical expertise and professional credibility.

Software Development Engineer (SDE) Intern — Bluestock Fintech

Aug 2025 – Sep 2025

- Developed and enhanced backend modules in Java and SQL, improving core application functionality for a live fintech product.
- Contributed to database management and backend integration, supporting reduced query response time.
- Executed debugging, unit testing, and feature implementation cycles to ensure stable, production-ready releases.

PROJECTS

Optimization-Driven Deep Neural Framework for Alzheimer's Disease Screening | Python, TensorFlow, Keras

- Designed and trained a deep learning model using the **OASIS Alzheimer's MRI dataset** to automate early-stage Alzheimer's disease screening.
- Applied data preprocessing, hyperparameter tuning, and optimization techniques to improve prediction accuracy and computational efficiency.
- Achieved **93.7% test accuracy** and published the research at **ICIRIST 2026 (ISBN: 978-93-5782-647-1)** after successful peer review.

Interactive Business Intelligence Dashboards | *Power BI, Tableau, Excel, Python (Pandas, Matplotlib)*

- Developed interactive Sales, HR, and Operations dashboards to monitor KPIs, business performance, and operational trends.
- Automated data cleaning, transformation, and reporting workflows using Power Query and Python (Pandas), reducing manual reporting effort by **40%**.
- Delivered actionable insights through dynamic visualizations, drill-through reports, and KPI tracking to support data-driven decision-making.

Smart Agriculture AI | *Python, FastAPI, React, TensorFlow, Keras, Streamlit, Tailwind CSS*

- Developed an AI-powered smart agriculture platform that provides crop recommendations and plant disease detection using machine learning models.
- Built a FastAPI backend with a React and Tailwind CSS frontend to deliver real-time predictions through an intuitive web interface.
- Integrated machine learning models for crop recommendation and disease classification, enabling data-driven farming decisions.
- Implemented REST APIs, image-based prediction workflows, and interactive dashboards using Streamlit for model visualization and analysis.

Employee Data Analysis System | *SQL, MySQL*

- Designed and analyzed a relational employee database to evaluate workforce performance, salary distribution, and employee attrition trends.
- Utilized joins, subqueries, views, stored procedures, and aggregate functions to optimize recurring analytical reports.
- Generated structured business reports that supported HR and management decisions on department performance and workforce planning.

Parking Lot Management System (Low-Level Design) | *Java, OOP, DSA, UML*

- Designed a scalable parking lot management system using Java, Object-Oriented Programming, and SOLID design principles.
- Created UML class, sequence, and use-case diagrams to define the system architecture before implementation.
- Implemented core modules for vehicle entry and exit, parking slot allocation, ticket generation, payment processing, and billing.

Enterprise Registration & Identity Management Portal (ERIMP) | *Java, HTML/CSS, JavaScript, MySQL*

- Developed a full-stack enterprise registration portal with secure user authentication, session management, and database integration.
- Implemented complete CRUD operations, form validation, and persistent data storage using MySQL.
- Integrated frontend and backend components into a modular, production-style web application following industry-standard development practices.

ACHIEVEMENTS

- Published research paper “Optimization-Driven Deep Neural Framework for Automated Alzheimer's Disease Screening” at ICIRIST 2026 (ISBN: 978-93-5782-647-1).
- Presented “Hybrid Convergence of Education Dynamic” at the 5th International Conference on Recent Trends in Engineering, Technology and Management (2025).
- Secured 2nd Place in a Data Analytics Competition for a business-focused Power BI dashboard (2025).

CERTIFICATIONS

- IBM SkillsBuild — Data Fundamentals (2026)
- British Airways Data Science Job Simulation — Forage (Jun 2026)
- Deloitte Data Analytics Job Simulation — Forage (Jul 2025)
- UniAthena (Cambridge International Qualifications): ML Algorithms, Python, Power BI, DAX, Power BI Visualization, Excel Macros & Data Analytics, MS Excel Formulas & Functions (Apr–Jul 2025)
- Acacia University (UniAthena): Essentials of Data Visualization using MS Excel (May 2025)
